

State-of-the-art evaluation, design and implementation of indoor air and water quality systems and solutions

CONTINUUM ENVIRONMENTAL SERVICES gives you the solutions required to meet the environmental needs of your building occupants and governmental agencies.

- > Indoor Air Quality (IAQ) Services
- > Air Quality Innovative Solutions **AQUIS** AHU Condensate Pan Remediation
- > Mold and Microbiological Growth Remediation
- > Energy Efficiencies
- > Code Compliance
- > Water Sampling and Testing
- > Air Flow Management and Testing

We offer systems and solutions for a clean and compliant environment... Our patented products and systems, coupled with our proven performance and state-of-the-art tools, assist you in keeping compliant with environmental requirements.

Capabilities, features and benefits of CONTINUUM ENVIRONMENTAL SERVICES include:

• PATENTED PRODUCTS AND SYSTEMS:

CONTINUUM brings you AQUIS brand products, providing the only fully code-compliant, state-of-the-art system for air handling unit condensate pan remediation at a fraction of the cost of conventional fixes with minimal interruption in building operations. From building-related illnesses and sick building syndrome to building efficiency and repair, Indoor Air Quality (IAQ) issues are resolved to the satisfaction of building owners, property managers, tenants and governmental agencies.

• PROVEN PERFORMANCE:

Our highly-trained and experienced environmental services professionals work closely with you to ensure all tasks are complete and you are entirely satisfied. Once each task is complete, you and your tenants can take a customer satisfaction survey. To date, CONTINUUM has exceeded its 90 percent customer satisfaction benchmark.

• EXPERIENCED, PROFESSIONAL EMPLOYEES:

CONTINUUM environmental services professionals are AQUIS-certified and have years of experience and specialized training with HVAC, IAQ and water quality systems and solutions, from the routine to the highly technical.

The full-circle resource for building owners and property managers

• PROVIDING YOU WITH A TRUSTED SINGLE-SOURCE SOLUTION:

CONTINUUM provides a single-source solution for interior and exterior facility operations, maintenance and repair. Instead of coordinating multiple vendors, work with just one. With multidisciplinary expertise under one roof, CONTINUUM can streamline your facility's needs – while increasing the value of your asset.

• DELIVERING EXCEPTIONAL VALUE, SERVICE AND SATISFACTION:

CONTINUUM delivers exceptional value through our unique combination of knowledge, capability, performance and price. CONTINUUM enables your property to become a “High Performance Sustainable Building” and maximizes your assets’ return on investment. Facilities serviced by CONTINUUM have earned such prestigious accolades as the **ENERGY STAR®** award for superior energy performance, **BOMA’s The Office Building of the Year® (TOBY) Award** and **CEL’s National Real Estate “A List” Award for Service Excellence**.

• BENEFITING FROM THE CONTINUUM ADVANTAGE:

CONTINUUM customers benefit from our proprietary Computerized Maintenance Management Software system, which provides an easy-to-use web-based portal for customer requests, maintenance work orders, status tracking and inventory control. From your computer or wireless device, the system gives you, your team and your tenants ease, efficiency and control.

Our “Did You Know?” Continuum Approach

When it comes to your indoor air quality (IAQ), CONTINUUM SERVICES combines science and technology to solve your IAQ issues, reduce risk and save you money.

It is becoming more common for juries to side with plaintiffs in IAQ lawsuits, and 50 percent of all cases of poor IAQ result from badly designed or fitted HVAC systems that breed microorganisms. Traditional solutions include biocide tablets, replacement of HVAC components and even replacement of the entire HVAC unit. Using the AQUIS solution, CONTINUUM focuses on correcting the condensate drain pan, resulting in a more efficient, rust-free, anti-microbial environment that is free of standing water – a maintenance-free solution for the building owner. The safety of the building occupants is greatly improved, while the efficiency and life of the HVAC unit is increased – all at a fraction of the cost of conventional fixes, with minimal interruption in building operations.
