## Our “Did You Know?” Continuum Approach

**CONTINUUM SERVICES** provides everything needed for submitting maintenance requests, generating and tracking work orders, parts inventory, purchase orders and much more. You will save time and money while providing better maintenance response time. Because our computerized maintenance management software is so easy to use, your staff, tenants and customers not only embrace it, but they will love using it.

**THE CONTINUUM SYSTEM** is a web-based software program that allows you to track your work request from start to finish with real time updates available with the click of a mouse. Current requests, as well as historical data, are stored on a secured server so that you can access it 24/7. On average we respond and process over 1200 work requests per month. Metrics show that typical response time is 2 hours and that requests are routinely completed in less than 2.5 hours. Each of those same customer requests are offered an online customer satisfaction survey. To date, our customer satisfaction is consistently above 90 percent. Ask us for more information regarding how and when we can implement the use of the **CONTINUUM SYSTEM** to save your organization time and money.
